Business value and buyer fit

What your business gains

Business priority	Product value
Student continuity	Maintain connected records from application and enrolment through academic terms.
Academic coordination	Link schedules, attendance, assessments and student communications.
Campus service visibility	Coordinate library, residential, dining and access-related workflows.
Administrative control	Connect fees, finance, workforce, procurement and institutional assets.

Choosing this product

Choose CampusCore for institutions seeking an academic and operational system across departments. Hostel, dining and gate access may use companion applications or custom integrations within the agreed package.

A connected working process

Admit Receive applications and create enrolment and student records.

Teach and assess Schedule classes, capture attendance and manage examinations and results.

Serve the campus Provide portal access and manage library, residential, dining and access services.

Administer Collect fees and manage finance, people, purchasing and equipment.

Information for decisions

Academic teams can follow attendance and assessment activity by student and programme. Administrators can review fee dues and campus services, while finance and HR work from the linked institutional records.

Product capabilities

Capability	What it covers
Admissions and student records	Online applications, applicant stages, merit lists, student conversion, programmes, courses, terms and guardian records.
Scheduling and attendance	Timetables, clash detection, class groups, rooms, period-wise attendance, leave and shortage reports.
Assessments and fees	Exam schedules, assessment criteria, grading scales, report cards, fee structures, instalments and receipts.
Student and parent portals	Schedules, attendance, results, dues, online payments and self-service.
Library and residential life	Catalogues, library membership, issue and return records, fines, hostel rooms, beds and term reservations.
Dining and campus access	Meal planning, cafeteria sales, procurement and stock, gate passes, guardian checks and RFID or turnstile integration.
Finance and workforce	Accounting, India-focused tax and banking configuration, faculty and staff HR, payroll, shifts and biometric attendance.
Procurement and assets	Purchase requests, supplier quotations, orders, stores, equipment, depreciation, repairs and maintenance records.

Primary users

Institution leadership, admissions, faculty, examinations teams, students, parents, finance, HR and campus administrators.

Deployment and commercial engagement

Implementation and adoption

Academic structures, courses, terms, student records, grading rules, fees and opening balances establish the foundation. Campus services and institutional modules can follow the academic rollout.

Integrations

Academic workflows connect to finance and HR, with companion applications for residential life, dining and campus access. Payment, biometric and physical-access integrations are scoped to the institution's configured systems.

Technology and access

AFL develops and delivers this product. A modular education application shares an ERP foundation with accounting, HR, procurement and assets. Portals extend selected records to students and parents. Companion applications and APIs support campus-specific requirements.

Identity controls and role permissions separate academic, administrative, student and parent access. Private staff applications, device policies and multi-factor authentication can be combined with governed portal access and audit history.

Commercial options

Commercial component	What the proposal covers
Product access	One-time, monthly or annual arrangements, according to the selected product and agreement.
Implementation	Application setup, configuration, data migration, onboarding and training.
Custom development	Additional workflows, reports, integrations and agreed enhancements.
Support	Maintenance, patching, backup responsibilities and upgrades within the selected service plan.
Infrastructure	AFL-managed hosting, infrastructure, connectivity and integration requirements defined in the proposal.

Product scope, deployment options, integration requirements, service levels and pricing are defined in the customer proposal. Regulatory workflows support the agreed configuration and applicable operating requirements.
