AFL CareOrbit

Healthcare management suite

Product overview

AFL CareOrbit connects the patient journey with hospital resources, diagnostics, pharmacy and billing. Shared patient and service records help clinical and administrative teams coordinate care-related operations and financial processing.

Illustrative product view

Who it serves

Hospitals, clinics and healthcare institutions connecting patient administration, clinical workflows and financial operations.

Business value and buyer fit

What your business gains

Business priority	Product value
Patient continuity	Connect registration, appointments, encounters, investigations and inpatient records.
Capacity visibility	Coordinate practitioners, consultation schedules, beds and care locations.
Stock traceability	Manage pharmacy batches, expiry dates and dispensing records.
Revenue coordination	Consolidate clinical charges, consumables, insurance balances and accounting entries.

Choosing this product

Choose CareOrbit for connected hospital and clinical administration. First-expiry-first-out allocation and expired-batch blocking support pharmacy controls within the configured workflows.

A connected working process

Register and schedule Create or locate the patient record and book the relevant practitioner or service.

Provide services Record encounters, diagnostics, medication and inpatient activity.

Coordinate care transitions Manage admissions, transfers, discharge documentation and bed turnover.

Bill and reconcile Consolidate services and dispensed items, then allocate patient and insurance balances.

Information for decisions

Hospital administrators can review capacity and service activity. Laboratory and pharmacy teams can work from connected orders. Billing teams can reconcile charges with the services and supplies recorded during the patient journey.

Product capabilities

Capability	What it covers
Clinical foundation	Practitioner records, schedules, consultation slots, visit tariffs, departments, room types, beds and occupancy.
Patient and outpatient care	Registration, appointments, contacts, health and insurance identifiers, triage, encounters, diagnosis records and prescriptions.
Laboratory	Test profiles, sample collection records, result entry, reference ranges, abnormal-value flags, verification and report publication.
Inpatient care	Admissions, transfers, bed allocation, treatment records, discharge summaries and housekeeping turnover.
Pharmacy and inventory	Stores and outlets, batch and expiry records, purchase receipts, prescription-linked dispensing and stock ledgers.
Billing and insurance	Bed and service tariffs, diagnostics, pharmacy and consumables, consolidated invoices, patient and insurer balances, receivables and accounting.

Primary users

Hospital leadership, reception, clinicians, laboratory and pharmacy teams, billing staff and administrators.

Deployment and commercial engagement

Implementation and adoption

Practitioner and patient masters, departments, service units, test profiles, reference ranges, tariffs, pharmacy stock and financial balances guide implementation. Department-level rollout and staff training support adoption.

Integrations

Clinical modules connect to pharmacy, inventory, billing, insurance and accounting. Additional integrations and any external clinical systems are scoped for the institution.

Technology and access

AFL develops and delivers this product. A web-based clinical and ERP platform shares patient, practitioner, service and inventory records across modules. Configurable test profiles, tariffs and institutional master data support the selected workflows.

Role-based access and identity controls govern clinical and administrative users. Private staff access, encryption, audit history and recovery arrangements are configured for the institution. Clinical rules and reference ranges follow the institution's approved processes.

Commercial options

Commercial component	What the proposal covers
Product access	One-time, monthly or annual arrangements, according to the selected product and agreement.
Implementation	Application setup, configuration, data migration, onboarding and training.
Custom development	Additional workflows, reports, integrations and agreed enhancements.
Support	Maintenance, patching, backup responsibilities and upgrades within the selected service plan.
Infrastructure	AFL-managed hosting, infrastructure, connectivity and integration requirements defined in the proposal.

Product scope, deployment options, integration requirements, service levels and pricing are defined in the customer proposal. Regulatory workflows support the agreed configuration and applicable operating requirements.
